

Camera Print Readme – Windows Mobile SDK – C#

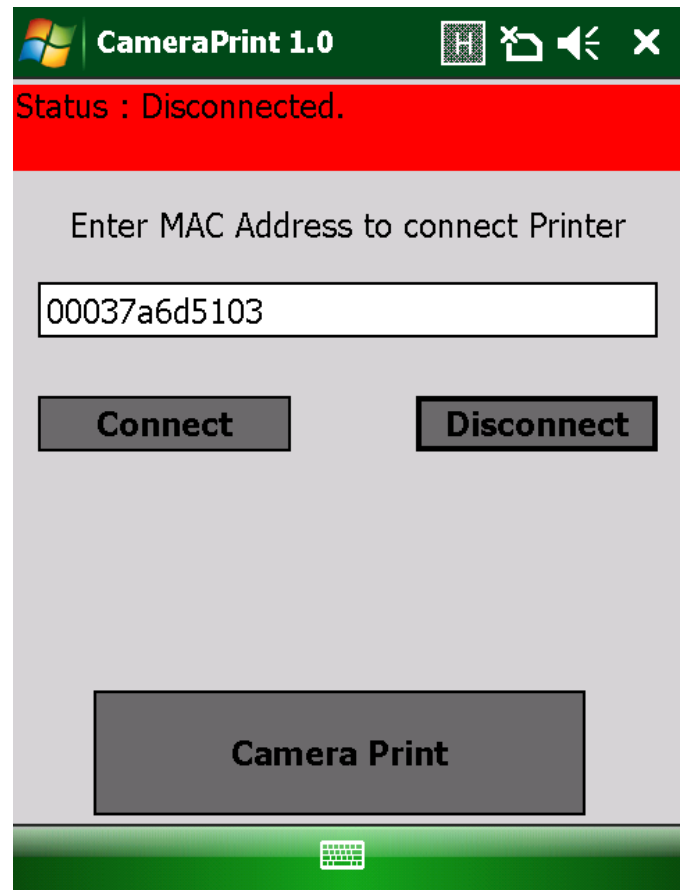

The sample demo application with source code is intended to provide an example of how to connect to Bluetooth devices from a Windows Mobile environment using the Zebra Multiplatform SDK and allows the user to take a picture with the WinMobile device's camera and print it to the Zebra printer.

The application was developed using Microsoft Visual Studio 2008 with the Windows Mobile 6.0 SDK. The application is designed to run on Windows Mobile 6.1 and requires .NET Framework 3.5.

The right asset. In the right place. At the right time.

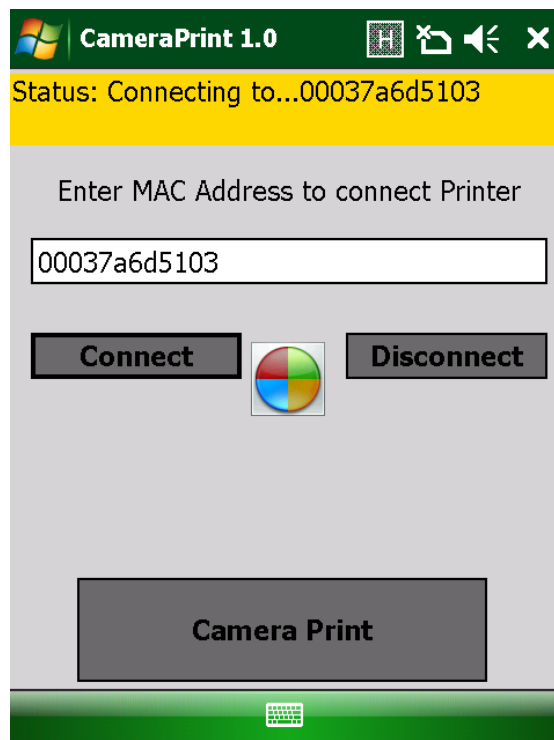

- The sample CameraPrint application demonstrates various features including:
 - Initialization

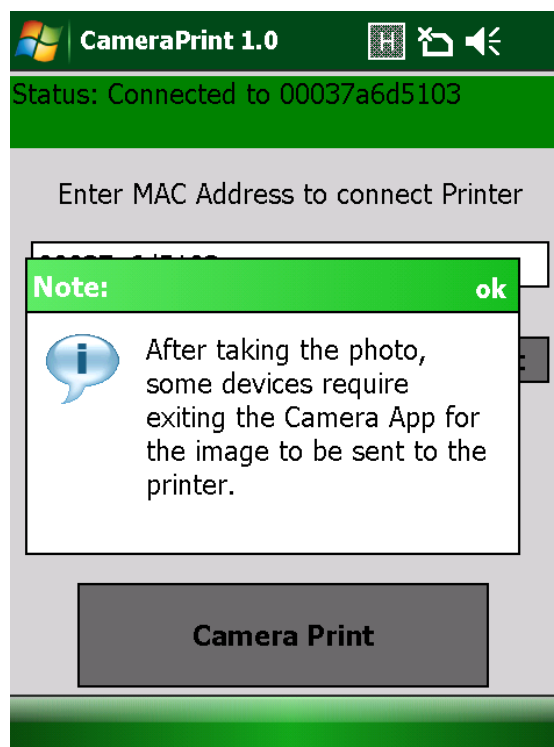

The right asset. In the right place. At the right time.

- The sample CameraPrint application demonstrates various features including:
 - Connecting

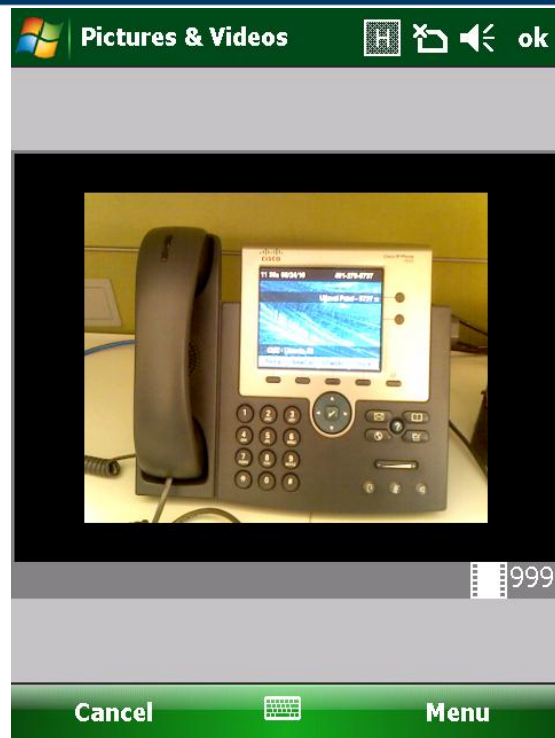

- The sample CameraPrint application demonstrates various features including:
 - Connection
