

## Bluetooth Discovery Demo – Windows Mobile SDK – C#

This sample application provides an example of how to discover and connect to nearby Bluetooth devices from a Windows Mobile environment using the Zebra Multiplatform SDK. It should be noted that the demo will detect any nearby, broadcasting Bluetooth device regardless of whether it is a Zebra printer or not. The application can only connect to Zebra devices.

The application was developed using MS Visual Studio 2008 with the Windows Mobile 6 SDK. The application is designed to run on Windows Mobile 6.1 and requires .NET Framework 3.5. This application is provided AS-IS, for example purposes only.
